

STAR-Seeder

The light-weight STAR-Seeder uses a spiked roller, spreading seed into thousands of holes.

Technical specifications	Star-Seeder 1500
Weight	210 kg (463 lbs)
Working width	1.5m (59")
Recommended tractor	17 hp with 260kgs (573 lbs) lifting capacity
Working depth	5-15 mm (0.2 – 0.59")
Seeding speed	max. 6 km/h (3.7 mph)
Number holes/ m ²	750 holes
Hopper capacity	70 ltr

The sharp pointed spikes of the STAR-Seeder penetrate the soil easily. This enables the seed to drop deeper into the soil, from where the conditions to germinate are optimal. A small vehicle is able to operate the light-weight STAR-Seeder, resulting in a very maneuverable combination.

The STAR-Seeder can be short-coupled with a bunker-vehicle.

Easy adjustments from the operator seat.
