

Spin-Rake

The Spin-Rake decompacts the infill in synthetic turf pitches.

When moving forward, the tines of the Spin-Rake oscillate sideways, thus they individually work intensely on small areas. The tines are very flexible thanks to their vertical "dented" shape.

The tines are very flexible, thanks to their vertical "dented" shape.

	Spin-Rake			
Model	150	200 ShortVersion	200	300 foldable
Working width	1.5 m (59")	2.0 m (79")	1.5 m (59")	2.0 m (79")
Weight	96 kg (212 lbs)	86 kgs (190 lbs)	96 kg (212 lbs)	86 kgs (190 lbs)
Number of pins	100	56	100	56

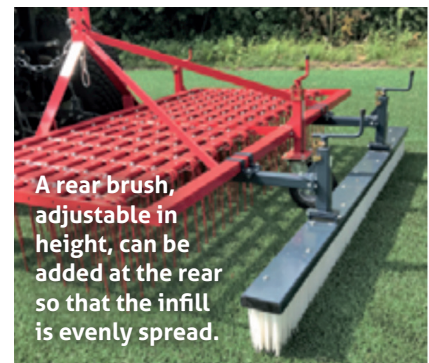

Optional: front tractor connection / rear brush / towbar with ball connection / dragmat / hydraulically foldable wings (300 foldable).

A towbar (here on the Spin-Rake 200 ShortVersion) is optional

The Spin-Rakes can be mounted to the tractor front 3-pt hitch, while a sweeper is added to the rear.

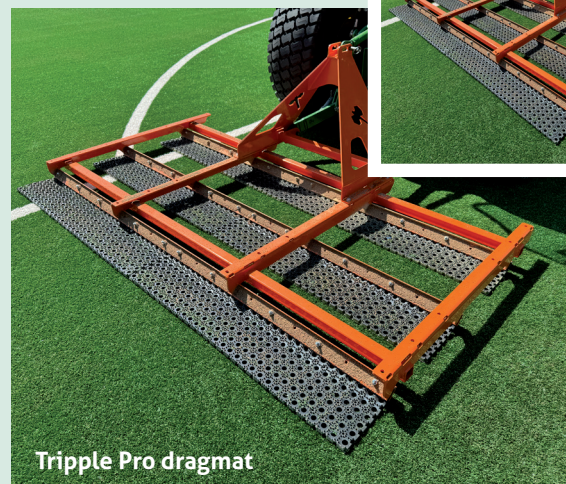

A rear brush, adjustable in height, can be added at the rear so that the infill is evenly spread.

Dragmat

Rubber dragmats work infill material into the carpet, as the pockets in the mat collect excess infill and draw it around the surface, redistributing it into lower areas and ensuring the surface is save and level.

Rubber Dragmat

Tripple Pro dragmat

The **Tripple Pro dragmat** is the most professional rubber dragmat in the market, available in working widths of 2.4 m and 4.8 m. 3 sections of dragmat, being carried in the 3-pt linkage of the tractor, quickly work access infill into the carpet.
